

2019 Environmental Justice Legislative Agenda

PRIORITIES

SUPPORT: AB 217 (E. Garcia) & SB 200 (Monning) Safe and Affordable Drinking Water Fund

Establishes the Safe and Affordable Drinking Water Fund, a reliable and ongoing funding source to ensure all Californians have access to safe, affordable drinking water. Without long-term funding support, water treatment and new clean water sources for small, rural and/or socioeconomically disadvantaged communities is cost-prohibitive.

SUPPORT: AB 1124 (Maienschein) Wildfire Protection

Requires the Occupational Safety and Health Standards Board to promptly adopt an emergency regulation to protect outdoor workers from wildfire smoke exposure. Wildfire smoke contains high levels of fine particulate matter (PM2.5). When inhaled these fine particles can reduce lung and heart function, which causes coughing, wheezing, and difficulty breathing.

SUPPORT: AB 1232 (Gloria) Healthy Homes Act

Creates and expands anti-displacement protections for state energy efficiency programs serving low-income customers. The bill guides agencies in data collection to ensure enforceability and to better penetrate the unregulated affordable housing market. The bill would also increase coordination and collaboration between the Low Income Weatherization Program and public health programs addressing health issues in homes of vulnerable residents.

SUPPORT: AB 1357 (Quirk) Department of Toxic Substances Control

Increases agency accountability by requiring Department of Toxic Substances Control (DTSC) to hold at least 4 public meetings a year to present on recent and upcoming decisions or actions relating to permitted hazardous waste facilities, clean up sites, and enforcement. The bill would also require DTSC's Director to run the meetings and to provide time for public testimony.

SUPPORT: AB 1628 (R. Rivas) Bureau of Environmental Justice

Supports the Attorney General's Bureau of Environmental Justice in its efforts to protect vulnerable communities from environmental hazards and adds "meaningful engagement" to the definition of environmental justice to ensure all voices are heard.

SUPPORT: SB 160 (Jackson) Cultural Competence in Emergency Planning

Requires counties to engage communities when updating emergency plans to ensure that local disaster preparedness and response activities (i.e. alerts, communications, evacuations, and sheltering) are culturally competent and meet diverse needs. This bill prioritizes reaching culturally diverse communities including immigrant and refugees and low-income communities of color among other groups.

ENERGY

SUPPORT: AB 961 (Reyes) Community Energy Benefits

Increases recognition of clean energy programs that serve environmental justice communities by ensuring that non-energy benefits factors such as reduced energy shutoffs, improved air quality and fire safety, and overall energy security are all taken into consideration by the California Public Utilities Commission during their cost-effectiveness analysis of potential programs.

CLIMATE JUSTICE | AIR QUALITY

SUPPORT: AB 423 (Gloria) San Diego Air District

Restructures the San Diego Air Pollution Control District Board so that it better reflects the diversity of San Diego County residents. The Board would include representation from additional San Diego cities and public members, including an environmental justice representative.

SUPPORT: SB 458 (Durazo) - Protect Children from Brain-Damaging Chlorpyrifos

Protects the health of children and frontline communities from the brain-toxic pesticide chlorpyrifos by prohibiting the use of the pesticide. The bill would positively impact environmental justice communities throughout the state, since these very communities, particularly in the San Joaquin Valley, are disproportionately exposed to chlorpyrifos.

DRINKING WATER | INFRASTRUCTURE

SUPPORT: AB 600 (Chu) Regional Planning

Ensures local governments provide basic water and wastewater services to disadvantaged communities in unincorporated areas by requiring that they develop plans, in collaboration with a Local Agency Formation Commission (LAFCO). This bill would ensure that these communities get the improvements and upgrades they desperately need.

SUPPORT: AB 508 (Chu) Consolidation and Extension of Water Service

Improves the State Water Resources Control Board's (SWRCB) process for ordering mandatory extension of drinking water service to households reliant on domestic wells. It would also require the SWRCB to provide additional information about drinking water problems and potential solutions to renters, as well as prevent additional fees.

OIL & GAS

SUPPORT: AB 345 (Muratsuchi) Health and Safety Zone

Creates a 2,500-foot protective distance between oil drilling sites and homes, schools, childcare facilities, healthcare facilities, and other sensitive locations. Oil and gas extraction poses severe environmental, health, and safety risks to nearby communities, which are disproportionately low-income communities and communities of color. This bill would ensure that oil drilling does not happen within such dangerous proximity to where people live.

GREEN ZONES

SUPPORT: SB 351 (Hurtado) Transformative Climate Communities

Expands the authority of the Strategic Growth Council to award neighborhood-level Transformative Climate Communities (TCC) implementation Grants to projects located in both incorporated and unincorporated communities. This bill would improve access to these grants by broadening eligibility to historically underinvested unincorporated areas where a significant percentage of the residents are low-income and people of color.

TRANSPORTATION

SUPPORT: SB 526 (Allen) Regional Transportation Plans

Establishes an interagency working group to develop and implement a State Mobility Action Plan for Healthy Communities to help achieve the state's environmental, equity, climate, health and housing goals.

SUPPORT: SB 210 (Leyva) Heavy-Duty Vehicle Inspections and Maintenance Program

Authorizes the California Air Resources Board (CARB) to develop and implement a comprehensive heavy-duty vehicle inspection and maintenance program, including fees and penalties for noncompliance to be deposited into the new Truck Emission Check Fund.
